

Curriculum Vitae

Personal data

Born November 1, 1968, Villena (Alicante), Spain. Spanish citizen.
Current work Dipartimento di Matematica "Tullio Levi-Civita", Università di Padova, Via Trieste, address 63, Padova.
Contact info + 39 320 442 99 21, e-mail: angeles.martinez@unipd.it

Education

1998 **Ph.D in Mathematics**, *Universidad Politecnica Valencia*, Spain, .
1993 **Laurea Specialistica (M.Sc.) in Computer Science**, *Universidad Politecnica Valencia*, Spain.
On July 12 2005 the spanish Laurea M. Sc. Laurea in Computer Science has been declared legally equivalent to the italian Laurea Specialistica in Informatica – classe 23/S, by the Università Cà Foscari of Venezia.

Ph.D Thesis

Title *Sobre la eficiencia y la estabilidad de los algoritmos básicos del Álgebra lineal en paralelo*
Supervisors Professor José Más Marí and Dr. Bruno Codenotti
Description I analyzed the parallel complexity of basic linear algebra algorithms for solving linear systems on the BSP computational model for parallel programming. I was also concerned with the stability of the fundamental Gaussian elimination algorithm. I introduced new pivoting strategies which produce stable factorizations on a number of sample matrices for which Gaussian elimination with partial pivoting is unstable.

Master Thesis

Title *Implementación de controladores neuroborrosos*
Supervisor Professor Jesús Picó Marco
Description The topic of my MSC thesis was the study of the application of artificial intelligence to the control of hybrid systems. I have analyzed in detail the possibility of using both neural artificial networks and fuzzy logic within the same control system, so as to include the learning ability of the neural networks-based systems into systems based on fuzzy logic by which the representation of the present knowledge is subject to uncertainty and inaccuracy. Different learning algorithms were studied and implemented and the hybrid resulting controller was applied to different applications like automatic truck parking and automatic trajectory planning.

Academic positions

- April 5, 2018 **Abilitazione nazionale a professore di seconda fascia.**
- July 2016 – **Ricercatore di tipo A**, *Università di Padova.*
- 2014–2016 **Assegnista di ricerca Senior**, *Università di Padova.*
Low rank updates of preconditioners to accelerate the Inexact Newton's method for the partial eigensolution of large and sparse symmetric positive definite problems.
- 2005–2006 **Assegnista di ricerca**, *Supervisor: Prof. M. Vianello*, *Università di Padova.*
Parallel computing methods for the implementation of exponential integrators for ODEs/PDEs.
- 2000–2002 **Postdoctoral Fellow**, *Supervisor: Prof. G. Pini*, *Università di Padova.*
Parallel implementation of Finite Element and Finite Volume codes for the discretization of partial differential equations.
- 1996–1999 **Assistant Professor**, *Departamento Matematica Aplicada*, *Universidad Politecnica Valencia.*

Research Contracts

- 2012–2013 **Term contract**, *Supervisor: Prof. M. Putti*, Parallel preconditioners for saddle point and nonlinear systems of equations, 1 Year.
- 2010 **Research Grant**, *Supervisor: Prof. G. Pini*, PRIN project: Parallel iterative methods for indefinite linear systems arising from the FE discretization of PDE modeling flow and geomechanical coupled models, 5 Months.
- 2009–2010 **Research Grant**, *Supervisor: Prof. G. Pini*, PRIN project: Advanced numerical methods and models with applications to fluid mechanics and environmental geomechanics, 1 Year.
- 2006 **Research contract**, *Supervisor: Prof. G. Pini*, Parallel preconditioners for iterative solvers of linear systems arising from the discretization of fluid dynamics models, 6 Months.
- 2004 **Research contract**, *Supervisor: Prof. G. Pini*, Parallel implementation of iterative methods for flow and transport equations which model infiltration problems in porous media, 1 Month.
- 2004 **Research contract**, *Supervisor: Prof. M. Vianello*, Parallel implementation of exponential integrators for ODE/PDE solvers, 2 Months.
- 2004 **Research contract**, *Supervisor: Prof. A. Pietracaprina*, Development of BSP supports on IBM SP/3 parallel machine, 5 Months.
- 2003 **Research contract**, *Supervisor: Prof. G. Pini*, Parallel implementation of iterative methods for flow and transport equations which model infiltration problems in porous media, 3 Months.
- 2003 **Research contract**, *Supervisor: Prof. G. Pini*, Development of approximate inverse based parallel preconditioners for 3D flow and transport codes, 1 Month.
- 1993 – 1996 **Research grant**, *Supervisor: Prof. R. Bru*, EC-funded project: *ESPRIT PROJECT 9072–GEPPCOM. Foundations of General Purpose Parallel Computing*, 3 Years.

Maternity leave

I have taken two maternity leaves: the first one on 1999-2000 and the second one from July 2007 to March 2009. This long gap in my research activity was due to my decision of taking care of my daughter who had a highly preterm birth and was having health problems.

Research Interests

Scientific computing, Numerical Linear Algebra: Sparse Matrix Computations, Iterative Methods, Preconditioning Techniques, Parallel Computing, Matrix Functions. Applications to Computational Fluid Dynamics and Structural Mechanics. My main topic is iterative methods for linear systems solution as well as partial solution of eigenproblems in the hermitian case, with the main emphasis on preconditioning. I have studied, developed and implemented algorithms for solving this kind of problems both in sequential and parallel computing environments. More specifically during the years I have worked on the following areas:

1. **Cost study and implementation of parallel algorithms for solving linear systems.**
2. **Error analysis of Gaussian elimination and development of new pivoting strategies.**
3. **Parallel preconditioning of large sparse linear systems.**
4. **Parallel preconditioning of CG-like methods for the symmetric eigenvalue problem.**
5. **Quasi-Newton preconditioner for Krylov solvers on the Inexact Newton method.**
6. **Parallelization of meshless methods for solving geomechanical problems.**
7. **Study and parallel implementation of exponential integrators** for the solution of discrete advection diffusion equations.
8. **Study and development of parallel preconditioners for saddle-point problems.**
9. **Preconditioners for the eigensolution of symmetric positive definite matrices of large size.**
10. **Low rank update of preconditioners for sequences of linear systems.**
11. **Preconditioner updates for sequences of linear systems in the Interior Point method for convex optimization problems.**
12. **Efficient computation of RBF and RBF based rational interpolants.**

Project involvement as PI or participant

- 2018-2019 Participation to the GNCS project: Metodi numerici per equazioni lineari, non lineari e matriciali con applicazioni.
- 2016-2018 Participation to the BIRD project: "Approximation and Discretization Methods for PDEs on Manifolds for Environmental Modeling".
- 2017-2018 Participation to the GNCS project: Metodi numerici per problemi di ottimizzazione vincolata di grandi dimensioni e applicazioni.
- 2016-2018 Participation to the "Progetto di Ateneo": Stable and efficient discretizations of the mechanics of faults.
- 2015-2016 PI of the IS CRA project PRECISO: Parallel Preconditioners for Iterative Solvers.
 - 2013 Participation to the IS CRA project PARPREC: Parallel Preconditioners for Advanced Engineering Applications.
 - 2011 Participation to the IS CRA project SPREAD: Scalable PREconditioners for Advanced Discretizations of geomechanical models.

- 2010 Participation to the ISCRA project PARPSEA: PARAllel Preconditioners for large Scale Engineering Applications.
- 2008-2010 Participation to the PRIN project: Metodi e modelli numerici avanzati con applicazioni di fluidodinamica e geomeccanica ambientale.
- 2004-2006 Participation to the PRIN project: Modelli numerici per flussi multifase e deformazione del suolo.
- 1998-2001 Participation to the Spanish DGES (Dirección general de educación superior) project “Problemas matriciales de sistemas de ecuaciones lineales y de sistemas de control discretos lineales”.
- 1997-1998 Participation to the spanish DGES project “Estudio e implementación de algoritmos para la resolución en paralelo de sistemas de ecuaciones”.
- 1996-1997 Participation to the spanish CICYT (Comisión Interministerial de Ciencia y Tecnología) project “Algoritmos numéricos en paralelo para problemas lineales”.
- 1993-1996 Participation to the EC-funded project: ESPRIT PROJECT 9072–GEPPCOM. Foundations of General Purpose Parallel Computing.

Publications

As is common practice in mathematics, the author order is usually alphabetical and does not reflect a difference in contribution.

Conference organization

I have taken active part in the organizing committee of the following schools/workshops:

- 1994 International Summer school: *Parallel Numerical Algorithms* in the framework of the project: ESPRIT PROJECT 9072–GEPPCOM (Foundations of General Purpose Parallel Computing). Location: Peñíscola (Spain) from May 30 to June 3, 1994.
- 1995 Workshop of the ESPRIT PROJECT 9072–GEPPCOM (Foundations of General Purpose Parallel Computing), held in Peñíscola (Spain) from November 27 to December 2, 1995.
- 2018 Workshop Due giorni di Algebra Lineare Numerica e Applicazioni, held in Padova (Italy) on 8-9 February, 2018.
- 2018 Workshop Seminari Padovani di Analisi Numerica (SPAN), held in Padova (Italy) on 3-4 May, 2018.

Other formation courses

- 1995 *Exemplar SPP: programming enviroment*. Organized by Convex Supercomputer S. A. E. Held at the central computer center of the Universidad Politécnica de Valencia (30 hours).
Advances in Software Tools and Applications for Multiprocessor Systems. COMETT course held at the Barcelona Supercomputing center on 10–12 May, 1995.

■ Bibliometrics

Complete statistics of my publications on relevant databases: ISI Web of Knowledge (ISI WoS), MathSciNet, Scopus. Last updated on April 2018.

ISI WoS	MathSciNet	Scopus	
25	18	29	publications
166	66	175	citations
6.6	3.7	6.1	average citation count per article
8	5	9	h-index

■ Computer skills

- Basic HTML, OpenOffice
- Intermediate L^AT_EX, Linux, C programming language
- Advanced Fortran 90, Matlab, MPI
- Vast experience in writing programs for parallel computing systems

■ Languages

- Spanish **Mother tongue**
- Italian **Excellent**
- English **Good**

■ Teaching Activities

Unless otherwise stated teaching activity is at the Faculty of Engineering, University of Padova. All the below mentioned courses are for undergraduate students.

- 1995–1996 *Computer science (Laboratorio)*, for Agricultural Engineering students at the Universidad Politecnica Valencia. **(Esercitazioni, 12 ore)**
- 1996–1997 *Linear Algebra*, Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos at the Universidad Politecnica Valencia. **(Titolare, 120 ore)**
- 1997–1998 *Linear Algebra*, Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos at the Universidad Politecnica Valencia. **(Titolare, 120 ore)**
- 1998–1999 *Linear Algebra*, Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos at the Universidad Politecnica Valencia. **(Titolare, 120 ore)**
- 2003–04 *Matematica*, in “Tecnologie Forestali e Ambientali”, Faculty of Agriculture. **(Esercitazioni, 40 ore)**
- 2006–07 *Calcolo Numerico (LAB)* in Architectural Engineering. **(Esercitazioni, 18 ore)**
- 2009–10 *Calcolo Numerico (LAB)* in Civil Engineering. **(Esercitazioni, 26 ore)**
Elementi di Algebra lineare e Geometria. in Architectural Engineering. **(Esercitazioni, 26 ore)**
- 2010–11 *Calcolo Numerico (LAB)* in Civil Engineering. **(Esercitazioni, 26 ore)**
- 2011–12 *Calcolo Numerico* in Informatics, Faculty of Sciences. **(Titolare, 64 ore)**
Calcolo Numerico in Industrial Engineering. **(32 ore)**
Calcolo Numerico (LAB) in Civil Engineering. **(Esercitazioni, 36 ore)**
- 2012–13 *Calcolo Numerico* in Industrial Engineering. **(32 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(Esercitazioni, 42 ore)**
Calcolo Numerico (LAB) in Mathematics, Faculty of Sciences. **(Esercitazioni, 16 ore)**
Matematica, in “Riassetto del territorio e tutela del paesaggio”, Faculty of Agriculture. **(Esercitazioni, 20 ore)**
- 2013-14 *Matematica*, in “Tecnologie Forestali e Ambientali”, Faculty of Agriculture. **(Titolare, 64 ore)**
Calcolo Numerico (LAB) in Mathematics, Faculty of Sciences. **(Esercitazioni, 16 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(Esercitazioni, 36 ore)**
- 2014-15 *Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(Esercitazioni, 14 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(Esercitazioni, 36 ore)**
- 2015-16 *Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(Esercitazioni, 16 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(Esercitazioni, 36 ore)**
- 2016-17 *Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(Esercitazioni, 16 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(Esercitazioni, 36 ore)**
- 2017-18 *Calcolo Numerico* in Mathematics, Faculty of Sciences. **(Titolare, 32 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(Esercitazioni, 24 ore)**
