Moreover, Prof Novara has been in charge of teaching general urology, urologic oncology, prostatic disease or functional urology in the residency programs of urology (2009-2010, 2010-2011, 2011-2012, 2012-2013, 2014-2015), nephrology (2010-2011, 2011-2012, 2012-2013, 2014-2015), and medical oncology (2010-2011, 2011-2012, 2012-2013) at University of Padua, Italy.

Since the academic year 2014-2015, Prof. Novara has taught urology at the school of nursing at University of Padua, Italy.

Prof. Novara has been thesis coordinator or advisor for 6 medical students and 4 urology residents.

Research activity

Urologic oncology and functional urology have been the major research interests of Prof. Giacomo Novara. Specifically, evaluation of prognostic factors in prostate, kidney, bladder, penile and upper tract cancers has been the major focus of most of his scientific work. Moreover, with regard to surgical issues, robotic surgery (especially application of robotics to prostate, kidney and bladder cancer treatments) has been the topic of several major publications, especially aiming at evaluating functional and patient reported outcomes

Prof. Novara has been an active member of several national and international collaborations aiming to evaluate prognostic factors in kidney, bladder, upper tract and prostatic cancers. These have included the urologic departments of the most prestigious European and US centers. Some of these include Weill Cornell Medical College, New York-Presbyterian Hospital, New York, NY; John Hopkins University, Baltimore, MD; Baylor College of Medicine, Houston, TX; University of Southern California, Los Angeles, California; University of Texas, M.
